A senior Full Stack Developer equipped with a MSc degree in IT and over 10 years of experience. Specialising in crafting sophisticated and scalable web applications with expertise in both frontend and backend development.

Experience

DesDeck

Head Software Engineer

January 2022 - Present

London, England, United Kingdom

🔗 <https://desdeck.com/>

Development of a cutting-edge visual website builder and hosting platform. Managing the backend and frontend of the application. The project involved creating a user-friendly interface that allows users to design and deploy websites effortlessly.

- Leading the implementation of critical components integral to the application's functionality: User Dashboard and Visual Editor
- Develop a REST communication layer between the application's back-end and user interface, ensuring seamless data exchange with the database
- Spearheaded the establishment of the Visual Editor, structuring the codebase into cohesive thematic and functional components
- Engineered responsive UI, facilitating adaptability across various devices, and ensuring optimal presentation on output pages
- Streamlined the application's workflow through meticulous optimization of asynchronous processes and SQL queries, fostering a fluid user experience

Tech stack: Laravel, React.js, Inertia.js, JavaScript, MySQL, PHP 8.1, HTML, CSS, Bootstrap

Dunster House

Senior Web Developer

April 2015 - November 2021

Bedford, England, United Kingdom

🔗 <https://dunsterhouse.co.uk/>

Development and maintenance of the UK's largest garden buildings e-commerce website, Dunster House and their second business, Windows and Doors.

- Writing well designed, clean and efficient code, delivering change that is high quality, maintainable, performant and secure, developing and managing well-functioning databases and web applications
- Integrating data from backend services and databases, developing and supporting the existing backend infrastructure
- Working on a diverse range of projects for internal and external applications using frontend and backend web development, improving current applications as well as creating greenfield projects
- Designing, Developing and Maintaining new integrations with most popular APIs and social media platforms
- Redeveloping existing sites onto cleaner and faster templates as well as modifying current functionalities to ensure easy usability
- Helping in the design, development and release applications including mobile and ecommerce features and payment integrations
- Building features and applications with a mobile responsive design, utilizing a variety of markup languages and maintaining brand consistency throughout the design
- Testing web applications to ensure responsiveness and efficiency, identifying and resolving performance and scalability issues, troubleshooting and bug fixing, making sure all changes are tested thoroughly and accurately before being deployed
- Supporting Marketing Department to setup seasonal and special promotions on the company, including imagery and any applicable discount codes
- Managing email campaigns for the business - producing email templates, scheduling sends and analysing results to carry out a continuous optimization
- Taking ownership for the full web development cycle from the definition, through design, build, test, release, and maintenance, controlling roadmaps of each project
- Ensuring that SEO best practices are implemented on the developed websites
- Advising on web solutions and technologies to further improve web applications and customer experience, developing ideas for new web applications and features by monitoring industry developments and trends
- Discussing requirements with non-technical users, compile and analyse data, processes and codes to troubleshoot problems and identify areas for improvement
- Developing features to enhance the user experience and ensuring user experience determines design choices, maximising conversion rates & driving customer satisfaction

Tech stack: PHP 7.4, Zend Framework, MySQL, jQuery, React.js, JavaScript, HTML, CSS
